Assignment - 5 University Website

1 Aim :

Design and implement a React.js-based menu navigation system for a university website containing menus such as About Us, Academics, Admissions, Research, Campus Life, Placements, and Contact Us. Implement dropdown menus for relevant sections and use React components, props, JSX, event handling, and React Router to provide smooth navigation between pages.

2 Code Implementation :

2.1 index.html

```
Lab-5 > University Website > index.html > ...
1  <!doctype html>
2  <html lang="en">
3    <head>
4      <meta charset="UTF-8" />
5      <link rel="icon" type="image/svg+xml" href="/favicon.svg" />
6      <meta name="viewport" content="width=device-width, initial-scale=1.0" />
7      <title>university-website</title>
8    </head>
9    <body>
10     <div id="root"></div>
11     <script type="module" src="/src/main.jsx"></script>
12   </body>
13 </html>
14
```

2.2 index.css

```

3 Website :

4 Conclusion :

The React-based university website was successfully developed with reusable components, dropdown menus, props, event handling, and React Router for smooth navigation. The website provides an organized menu structure for different university sections and demonstrates the use of React concepts in building a dynamic web application.
